

## Solo Singer/Songwriter Package

### Process:

#### **Purchase and Set up your recording time & date**

- Look for an email from our Audio Engineer about setting up your recording session. Spots are filled quickly, so the faster the better.
- If you do not receive an email, please contact us at [recording@imurj.com](mailto:recording@imurj.com)

#### **Prepare your song**

- Decide on the important things! Deciding on the use of a click-track, bpm, arrangement, and instrumentation are all time-savers that will make your session run smoothly.

#### **Prepare yourself**

- Practice is important. Recordings last forever so don't leave your performance up to chance.

---

### Additional Guidelines

The following information is meant to outline the specific limits of our *Solo Singer/Songwriter* package. If you've read this document and still have questions about your project's eligibility, please contact [recording@imurj.com](mailto:recording@imurj.com).

#### **Total Track Count Limit: 20**

Including tracks brought in from an outside source combined with what is recorded at imurj. This package price can be used to simply mix outside projects as well. Please ask even if you are slightly over the track limit.

**Vocal Tuning:** Included for 1-3 lead vocal tracks per song if necessary.

**Vocal/Instrument 'Comping':** Included for all audio recorded at Imurj as long as the artist records to a click-track.

**'Quick' Mastering:** is included for all tracks. We are not a mastering house, but all projects can be run through a solid mastering chain that leaves your mix at CD/Radio loudness.

**Delivery:** Purchaser of package will receive the final product upon completion/payment in full. Product includes up to 3 CDs, and an online downloadable link available for 1 month from project completion.

**Storage:** It is the artist's responsibility to provide their own backup storage for their projects. Bringing a Mac formatted external HD to each session is recommended. Files will be stored on Imurj's hard drives for 3 months following the delivery of the final product. However, this guarantee does not cover hard disc failures after the project's completion and all payment is non-refundable in this scenario.

**Time:** Since this package has a set rate, studio time will be allotted at the discretion of the engineer. Tracking and mixing time will be limited to <2 hours each. That being said, set rates are meant to make you think less about time and more about the music.
